Contents Volume 205 (1998)

Evidence for chemical changes on the root surface of tall fescue in response to infection with the fungal endophyte *Neotyphodium coenophialum*
D.P. Malinowski, G.A. Alloush and D.P. Belesky **1–12**

Water use by woody plants on contrasting soils in a savanna parkland: assessment with δ^2H and $\delta^{18}O$
A.J. Midwood, T.W. Boutton, S.R. Archer and S.E. Watts **13–24**

Organic acids in the rhizosphere – a critical review
D.L. Jones **25–44**

Root distribution in an Amazonian seasonal forest as derived from $\delta^{13}C$ profiles
L. da S.L. Sternberg, LaVictoria Green, M.Z. Moreira, D. Nepstad, L.A. Martinelli, and R. Victória **45–50**

Effect of four acid soils on root growth of white clover seedlings using a soil-on-agar procedure
P.W. Voigt, H.W. Godwin and D.R. Morris **51–56**

Potential to improve transfer of N in intercropped systems by optimising host-endophyte combinations
A.M. Mårtensson, I. Rydberg and M. Vestberg **57–66**

Variations in the natural abundance of ^{15}N in ryegrass/white clover shoot material as influenced by cattle grazing
J. Eriksen and H. Høgh-Jensen **67–76**

Gaseous hydrocarbons associated with black layer induced by the interaction of cyanobacteria and *Desulfovibrio desulfuricans*
C.F. Hodges and D.A. Campbell **77–83**

Growth, mineral nutrition and mycorrhizal colonization of red clover and cucumber plants grown in a soil amended with composted urban wastes
M.J. Sáinz, M.T. Taboada-Castro and A. Vilariño **85–92**

Cation exchange capacity and lead sorption in ectomycorrhizal fungi
P. Marschner, G. Jentschke and D.L. Godbold **93–98**

Isolation of an effective strain of *Frankia* from nodules of *Discaria trinervis* (Rhamnaceae)
E. Chaia **99–102**

Nodulation response of woody Papilionoid species after inoculation with rhizobia and soil from Hawaii, Asia and North America
C.M. Foster, H.T. Horner and W.R. Graves 103–111

Soil microarthropod contribution to forest ecosystem processes: the importance of observational scale
L. Heneghan and T. Bolger 113–124

N recovery from legume prunings and priming effects are governed by the residue quality
G. Cadisch, E. Handayanto, C. Malama, F. Seyni and K.E. Giller 125–134

Soil CO_2 efflux and its spatial variation in a Florida slash pine plantation
C. Fang, J.B. Moncrieff, H.L. Gholz and K.L. Clark 135–146

Inhibition of nitrification in forest soil by monoterpenes
L. Paavolainen, V. Kitunen and A. Smolander 147–154

Phosphorus supply and the growth of frequently defoliated white clover (*Trifolium repens* L.) in dry soil
D.K. Singh and P.W.G. Sale 155–162

The influence of salinity on growth, biomass production and photosynthesis of *Eucalyptus camaldulensis* Dehnh. and *Dalbergia sissoo* Roxb. seedlings
J.S. Rawat and S.P. Banerjee 163–169

Insights into mycorrhizal colonisation at elevated CO_2: a simple carbon partitioning model
P.L. Staddon 171–180

Extracellular enzyme activities of the ericoid mycorrhizal endophyte *Hymenoscyphus ericae* (Read) Korf & Kernan: their likely roles in decomposition of dead plant tissue in soil
J.W.G. Cairney and R.M. Burke 181–192

Fine root length production, mortality and standing root crop dynamics in an intensively managed sweetgum (*Liquidambar styraciflua* L.) coppice
J.S. Price and R.L. Hendrick 193–201

Volume contents 203–204
